Going around in Circles

Chandru Wadhvani

Extrupet, Johannesburg, South Africa

Abstract

In the drive to true sustainability, the word "Circular" is banded around more and more. Understanding the concept of "Circularity" has itself become the challenge with many a definition now proving to be unsustainable. The presentation will address the confusion around the concept and will in essence be a journey that reflects a "walk in a circle" to arrive at what is its true definition.

Main Themes

Sustainability and Climate
